Product summary

Order code	See Table 13.
Package	QFN-2L 1.6 x 1.0
Packing	Tape and reel

Features

- Single line unidirectional EOS and ESD protection diode
- Protects one I/O line or power line
- Stand-off voltage range from 5.5 V to 22 V
- Low leakage current at V_{RM}
- High peak pulse power (8/20 μ s) up to 1400 W
- Low power derating across the temperature range
- Fast turn-on and low clamping voltage
- Operating T_j max: 150 °C
- 1.6 mm x 1.0 mm QFN package saves board space
 - 75 % smaller in footprint compared to SOD-123FL
- **ECOPACK2** ROHS compliant component
- Complies with J-STD-020 MSL level 1
- Complies with IEC 61000-4-5 (Lightning)
 - 8/20 μ s: up to 120 A
- Complies with IEC 61000-4-2 level 4
 - \pm 30 kV (air discharge)
 - \pm 30 kV (contact discharge)

Applications

Where transient overvoltage protection in ESD sensitive equipment is required, such as:

- USB type-C Vbus
- USB-PD up to 20 V
- Battery protection (V_{batt}) / charger port
- Power supply line protection
- Hard disks and SSD
- Portable multimedia devices and accessories
- Industrial application
- Medical and healthcare equipment

Description

ESDAxxPxxx-1U1M transient voltage suppressor (TVS) series are designed for use in harsh environments to protect sensitive electronics from damage or latch-up due to electrical overstress (EOS), lightning surge and ESD without aging effect and performance drifts.

The series features desirable characteristics for board level protection including fast response time, excellent clamping voltage capability compared to standard TVS devices, and high surge current capability with low derating across the temperature range. In addition, this series is available in a small 1.6 mm × 1.0 mm footprint, ideal for space constrained applications.

The ESDAxxPxxx-1U1M series can be evaluated thanks to the [STEVAL-OET005](#) evaluation board.

1 Characteristics

Table 1. Absolute maximum ratings ($T_{amb} = 25\text{ }^{\circ}\text{C}$)

Symbol	Parameter	Value	Unit	
V_{PP}	Peak pulse voltage	IEC 61000-4-2 – C = 150 pF, R = 330 Ω : Contact discharge	± 30	kV
		Air discharge	± 30	
P_{PP}	Peak pulse power	IEC 61000-4-5 (2 Ω) – tp = 8/20 μs	700 – 1400	W
I_{PP}	Peak pulse current	IEC 61000-4-5 (2 Ω) – tp = 8/20 μs	See Table 2.	A
T_{stg}	Storage junction temperature range		-55 to + 150	$^{\circ}\text{C}$
T_j	Maximum operating junction temperature		-55 to + 150	
T_L	Maximum lead temperature for soldering during 10 s		260	

Figure 1. Electrical characteristics (definitions)

- Specified by design – not tested in production.
- Measured from pin 1 to 2, in accordance with IEC 61000-4-5 (8/20 μs current waveform).
- To calculate typical clamping voltage at other surge level, use the following formula: $V_{CL\ typ} = V_{BR\ typ.} + R_D \times I_{PP\ appli}$ where $I_{PP\ appli}$ is the surge current in the application.

Table 3. ESDA7P60-1U1M Electrical characteristics ($T_{amb} = 25\text{ }^{\circ}\text{C}$, unless otherwise specified)

Symbol	Parameter definition	Test condition	Min.	Typ.	Max.	Unit
V_{RM}	Reverse Stand-Off voltage	Pin 1 to pin 2			5.0	V
