

## CMOS Quad Bilateral Switch

### Description :

The CD4066 device is a quad bilateral switch intended for the transmission or multiplexing of analog or digital signals. In addition, the on-state resistance is relatively constant over the full signal input range.

The CD4066 device consists of four bilateral switches, each with independent controls. Both the p and the n devices in a given switch are biased on or off switch is tied to either the input (when the switch is on) or to  $V_{SS}$ (when the switch is off). This configuration eliminates the variation of the switch-transistor threshold voltage with input signal and, thus, keeps the on-state resistance low over the full operating-signal range.

The advantages over single-channel switches include peak input-signal voltage swings equal to the full supply voltage and more constant on-state impedance over the input-signal range.

### Features :

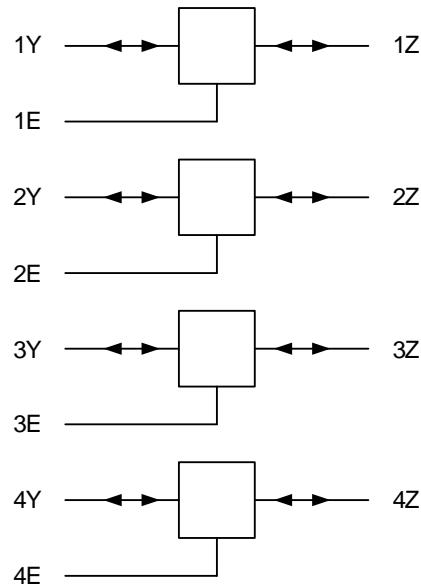

- Wide Operating Voltage Range of 3.0V to 18.0V
- Maximum Input Current of 1 $\mu$ A at 18V over Full Package-Temperature range, 100nA at 18V and 25°C
- Standardized Symmetrical Output Characteristics
- Noise Margin
  - 1.0V min @ 5.0V supply
  - 2.0V min @ 10.0V supply
  - 2.5V min @ 15.0V supply

### Absolute Maximum Ratings :

CHARACTERISTIC	SYMBOL	MIN.	MAX.	UNIT
DC Supply Voltage (Referenced to $V_{SS}$ )	$V_{DD}$	-0.5	20	V
Digital Input Voltage (Referenced to $V_{SS}$ )	$V_{IN}$	-0.5	$V_{DD} + 0.5$	V
Analog Input Voltage (Referenced to $V_{SS}$ )	$V_{IS}$	-0.5	$V_{DD} + 0.5$	V
Analog Output Voltage (Referenced to $V_{SS}$ )	$V_{OS}$	-0.5	$V_{DD} + 0.5$	V
DC Input Current	$I_{IN}$	-	$\pm 10$	mA
Storage Temperature	$T_{STG}$	-65	150	°C

Note1. Stresses beyond those listed under *Absolute Maximum Ratings* may cause permanent damage to the device. These are stress ratings only and functional operation of the device at these or any other conditions beyond those indicated under *Recommended Operating Conditions* is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.
