

R-11/

CONTACT CLEANER

R-11 has been studied for dissolving and removing oxidation from any electrical contact: electrical and electromechanical slide contacts, switches, push buttons, commutators, plugs, sockets, keyboards...etc.

Thanks to a special chemical additive, prevents a new oxidation process in the treated parts.

It eliminates the creaking of potentiometers.

It assures a deep and effective cleaning in linear and sliding contacts, without any risk for the support plastic materials.

- OZONE SAFE
- CFC AND HCFC FREE
- CHLORINATED SOLVENTS FREE
- SAFE FOR MOST PLASTICS
- HIGHLY PROTECTIVE
- LUBRICATING AND ANTI-CORROSIVE PROPERTIES
