

# LM124, LM224, LM324

## Low power quad operational amplifiers

### Features

- Wide gain bandwidth: 1.3 MHz
- Input common-mode voltage range includes ground
- Large voltage gain: 100 dB
- Very low supply current per amplifier: 375  $\mu$ A
- Low input bias current: 20 nA
- Low input offset voltage: 5 mV max.
- Low input offset current: 2 nA
- Wide power supply range:
  - Single supply: +3 V to +30 V
- Dual supplies:  $\pm 1.5$  V to  $\pm 15$  V

### Description

The LM124, LM224 and LM324 consist of four independent, high gain, internally frequency-compensated operational amplifiers. They operate from a single power supply over a wide range of voltages. Operation from split power supplies is also possible and the low power supply current drain is independent of the magnitude of the power supply voltage.

| ESD        | HBM: human body model <sup>(7)</sup>   | 250   |             |          | V    |
|            | MM: machine model <sup>(8)</sup>   | 150   |             |          |      |
|            | CDM: charged device model <sup>(9)</sup>   | 1500  |             |          |      |

1. Either or both input voltages must not exceed the magnitude of  $V_{CC}^+$  or  $V_{CC}^-$ . All voltage values, except differential voltages are with respect to ground terminal.
2. Differential voltages are the non-inverting input terminal with respect to the inverting input terminal.
3. Short-circuits from the output to  $V_{CC}$  can cause excessive heating if  $V_{CC} > 15$  V. The maximum output current is approximately 40 mA independent of the magnitude of  $V_{CC}$ . Destructive dissipation can result from simultaneous short-circuits on all amplifiers.
4. This input current only exists when the voltage at any of the input leads is driven negative. It is due to the collector-base junction of the input PNP transistor becoming forward-biased and thereby acting as input diode clamp. In addition to this diode action, there is NPN parasitic action on the IC chip. This transistor action can cause the output voltages of the op-amps to go to the  $V_{CC}$  voltage level (or to ground for a large overdrive) for the time during which an input is driven negative. This is not destructive and normal output is restored for input voltages above -0.3 V.
5. The junction base/substrate of the input PNP transistor polarized in reverse must be protected by a resistor in series with the inputs to limit the input current to 400  $\mu$ A max ( $R = (V_{in} - 32 \text{ V})/400 \mu\text{A}$ ).
6. Short-circuits can cause excessive heating. Destructive dissipation can result from simultaneous short-circuits on all amplifiers. These are typical values given for a single layer board (except for TSSOP, a two-layer board).
7. Human body model, 100 pF discharged through a 1.5 k $\Omega$  resistor into pin of device.
8. Machine model ESD: a 200 pF capacitor is charged to the specified voltage, then discharged directly into the IC with no external series resistor (internal resistor < 5  $\Omega$ ), into pin-to-pin of device.
9. Charged device model: all pins plus package are charged together to the specified voltage and then discharged directly to ground.

### 3 Electrical characteristics

**Table 2.**  $V_{CC}^+ = +5\text{ V}$ ,  $V_{CC}^- = \text{ground}$ ,  $V_o = 1.4\text{ V}$ ,  $T_{\text{amb}} = +25^\circ\text{ C}$  (unless otherwise specified)

- $V_o = 1.4\text{ V}$ ,  $R_s = 0\ \Omega$ ,  $5\text{ V} < V_{CC}^+ < 30\text{ V}$ ,  $0 < V_{\text{ic}} < V_{CC}^+ - 1.5\text{ V}$ .
- The direction of the input current is out of the IC. This current is essentially constant, independent of the state of the output so there is no change in the load on the input lines.
- The input common-mode voltage of either input signal voltage should not be allowed to go negative by more than 0. V. The upper end of the common-mode voltage range is  $V_{CC}^+ - 1.5\text{ V}$ , but either or both inputs can go to +32 V without damage.
- Due to the proximity of the external components, ensure that stray capacitance between these external parts does not cause coupling. Coupling can be detected because this type of capacitance increases at higher frequencies.

## 5 Package information

In order to meet environmental requirements, ST offers these devices in different grades of ECOPACK<sup>®</sup> packages, depending on their level of environmental compliance. ECOPACK<sup>®</sup> specifications, grade definitions and product status are available at: [www.st.com](http://www.st.com). ECOPACK<sup>®</sup> is an ST trademark.

## 6 Ordering information

**Table 6. Order codes**

| Part number | Temperature range | Package   | Packing             | Marking |
|-------------|-------------------|-----------|---------------------|---------|
| LM124N      | -55°C, +125°C     | DIP14     | Tube                | LM124N  |
| LM124D/DT   |                   | SO-14     | Tube or tape & reel | 124     |
| LM224N      | -40°C, +105°C     | DIP14     | Tube                | LM224N  |
| LM224D/DT   |                   | SO-14     | Tube or tape & reel | 224     |
| LM224PT     |                   | TSSOP14   | Tape & reel         | 224     |
| LM224QT     |                   | QFN16 3x3 | Tape & reel         | K425    |
| LM324N      | 0°C, +70°C        | DIP14     | Tube                | LM324N  |
| LM324D/DT   |                   | SO-14     | Tube or tape & reel | 324     |
| LM324PT     |                   | TSSOP14   | Tape & reel         | 324     |
| LM324QT     |                   | QFN16 3x3 | Tape & reel         | K427    |

## 7 Revision history

**Table 7. Document revision history**

| Date         | Revision | Changes   |
|--------------|----------|---|
| 01-Oct.-2003 | 1        | First release.  |
| 02-Jan-2005  | 2        | Modifications on AMR <a href="#">Table 1 on page 3</a> (explanation of $V_{id}$ and $V_i$ limits).  |
| 01-Jun-2005  | 3        | ESD protection inserted in <a href="#">Table 1 on page 3</a> .  |
| 02-Jan-2006  | 4        | $T_j$ and $R_{thjc}$ parameters added in <a href="#">Table 1. on page 3</a> .   |
| 04-Oct-2006  | 5        | Editorial update. <a href="#">Table 3</a> moved to <a href="#">Section 5: Macromodels on page 11</a> .  |
| 11-Jan-2010  | 6        | Added AMR values for input current in <a href="#">Table 1 on page 3</a> .   |
| 30-Jun-2011  | 7        | Added pin connections for QFN16 package in <a href="#">Figure 1 on page 2</a> .<br>Added thermal information for QFN16 package in <a href="#">Table 1 on page 3</a> .<br>Added QFN16 package information in <a href="#">Chapter 5</a> .<br>Added order codes for QFN16 package in <a href="#">Table 6: Order codes</a> .<br>Removed Spice model - refer to <a href="http://www.st.com">www.st.com</a> for latest model available. |

**Please Read Carefully:**

Information in this document is provided solely in connection with ST products. STMicroelectronics NV and its subsidiaries ("ST") reserve the right to make changes, corrections, modifications or improvements, to this document, and the products and services described herein at any time, without notice.

All ST products are sold pursuant to ST's terms and conditions of sale.

Purchasers are solely responsible for the choice, selection and use of the ST products and services described herein, and ST assumes no liability whatsoever relating to the choice, selection or use of the ST products and services described herein.

No license, express or implied, by estoppel or otherwise, to any intellectual property rights is granted under this document. If any part of this document refers to any third party products or services it shall not be deemed a license grant by ST for the use of such third party products or services, or any intellectual property contained therein or considered as a warranty covering the use in any manner whatsoever of such third party products or services or any intellectual property contained therein.

**UNLESS OTHERWISE SET FORTH IN ST'S TERMS AND CONDITIONS OF SALE ST DISCLAIMS ANY EXPRESS OR IMPLIED WARRANTY WITH RESPECT TO THE USE AND/OR SALE OF ST PRODUCTS INCLUDING WITHOUT LIMITATION IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE (AND THEIR EQUIVALENTS UNDER THE LAWS OF ANY JURISDICTION), OR INFRINGEMENT OF ANY PATENT, COPYRIGHT OR OTHER INTELLECTUAL PROPERTY RIGHT.**

**UNLESS EXPRESSLY APPROVED IN WRITING BY AN AUTHORIZED ST REPRESENTATIVE, ST PRODUCTS ARE NOT RECOMMENDED, AUTHORIZED OR WARRANTED FOR USE IN MILITARY, AIR CRAFT, SPACE, LIFE SAVING, OR LIFE SUSTAINING APPLICATIONS, NOR IN PRODUCTS OR SYSTEMS WHERE FAILURE OR MALFUNCTION MAY RESULT IN PERSONAL INJURY, DEATH, OR SEVERE PROPERTY OR ENVIRONMENTAL DAMAGE. ST PRODUCTS WHICH ARE NOT SPECIFIED AS "AUTOMOTIVE GRADE" MAY ONLY BE USED IN AUTOMOTIVE APPLICATIONS AT USER'S OWN RISK.**

Resale of ST products with provisions different from the statements and/or technical features set forth in this document shall immediately void any warranty granted by ST for the ST product or service described herein and shall not create or extend in any manner whatsoever, any liability of ST.
